

Linux tools

Last modified: 2014-10-07 14:50:00

Linux tools I should use more often

- dnf [Dandified Yum](#)
- pv [pipe viewer](#)
 - Documentation: <http://www.ivarch.com/programs/quickref/pv.shtml>
- watch watch command output

Task	Command
Copy file, watch progress	<code>pv < /path/to/source > /path/to/dest</code>
Watch command output	<code>watch -n SECONDS 'cmd1 cmd2'</code>
